- Publishing Automation - Powershell
- Maintenance Release Notes Automation - Python
- Documentation Workflow Automation

Tools

- Adobe RoboHelp
- Confluence
- JIRA
- GitHub
- VS Code
- Snagit

Key Achievements

60%

PUBLISHING EFFORT REDUCED

Publishing Automation

Automated RoboHelp documentation publishing workflows using PowerShell, significantly reducing manual publishing effort.

80%

MANUAL WORK REDUCED

JIRA Automation

Developed a Python-based automation tool to extract JIRA data and generate maintenance release notes, significantly reducing manual effort and improving accuracy.

3×

DOCUMENTATION GAPS REDUCTION

Documentation Governance

Established a Content Review Board to define and enforce documentation governance frameworks, including standards, ownership models, and structured review workflows.

2×

FASTER DELIVERY

Docs-as-Code

Established a Docs-as-Code workflow using GitHub and Docusaurus, integrating documentation into development pipelines and version control.

Work Experience

Vitech Systems (Acquired by Majesco)

SENIOR LEAD TECHNICAL WRITER | 2021 – PRESENT

- Led end-to-end documentation strategy for enterprise SaaS insurance platforms, aligning content with product and engineering workflows.
- Implemented a Docs-as-Code approach, integrating documentation into CI/CD pipelines to improve release velocity and consistency.
- Developed PowerShell automation reducing publishing effort by ~60% and eliminating manual dependencies.
- Built Python-based automation reducing maintenance release note creation effort.
- Standardized documentation architecture and TOC frameworks across multiple product lines, improving usability and discoverability.
- Established and led a Content Review Board, significantly improving content quality, governance, and consistency.
- Mentored and coached technical writers, elevating team capability and driving adoption of best practices.

Amphora Software

SENIOR TECHNICAL WRITER | 2020 – 2021

- Managed the end-to-end documentation lifecycle, ensuring alignment with product release cycles and timely delivery of high-quality content.
- Developed comprehensive user guides, configuration documentation, and operational manuals to support product adoption and customer onboarding.
- Standardized documentation templates and structures, improving consistency, readability, and maintainability across deliverables.
- Established repeatable documentation processes, reducing content gaps and improving efficiency in content creation and updates.

ValueLabs

SENIOR TECHNICAL WRITER | 2018 – 2020

- Reported directly to the CIO of American Credit Acceptance, providing visibility into executive-level priorities and aligning documentation initiatives with business objectives.
- Led enterprise-wide IT documentation initiatives, driving standardization and improving accessibility of critical technical information across teams.
- Authored and maintained API documentation using Postman, enabling seamless integration for internal and external stakeholders.
- Contributed to establishing documentation best practices, improving consistency and reducing redundancy across knowledge assets.

Cyient

SENIOR DESIGN ENGINEER | 2012 – 2018

- Produced comprehensive user manuals and online help systems, ensuring clear, accessible, and task-oriented content for end users.
- Developed documentation for internal tools at Boeing, translating complex system workflows into structured, user-friendly guidance.
- Improved content organization and navigation, enhancing user experience across help systems and documentation portals.
- Collaborated with engineering and internal stakeholders to validate technical accuracy and ensure documentation aligned with evolving product features.
