SKILLS

- Product Documentation
- Online Help Documents
- Release Notes
- API Documentation
- Troubleshooting Guides
- Standard Operating Procedures (SOPs)
- Documentation Architecture & Content Structuring
- Documentation Governance

TOOLS & TECHNOLOGIES

Documentation Tools

- Adobe RoboHelp
- Confluence
- Markdown

Development & Version Control

- Visual SourceSafe
- GitHub
- Visual Studio Code (VS Code)

Automation & Workflow

- PowerShell (Publishing Automation)
- Python (Jira Data Extraction Tool)
- JIRA

Productivity & Diagramming

- Microsoft Office 365
- Microsoft Visio
- Snagit

KEY ACHIEVEMENTS

- Automated documentation publishing workflows using PowerShell, reducing manual effort and improving release turnaround.
- Developed Python tools to automate JIRA data extraction for documentation workflows.
- Established documentation governance through a Content Review Board.
- Standardized documentation architecture across enterprise SaaS platforms.
- Mentored and trained new technical writers, improving onboarding efficiency and documentation quality standards.
- Built a Docs-as-Code POC using Docusaurus, GitHub, and VS Code to demonstrate version-controlled documentation workflows.

WORK EXPERIENCE

VITECH SYSTEMS — Lead Technical Writer | July 2021 – Present

- Led documentation strategy and delivery for enterprise SaaS insurance platforms supporting claims processing, policy configuration, commission workflows, and annuity products.
- Developed PowerShell-based automation for RoboHelp publishing workflows, significantly reducing manual publishing effort by ~**60%** and accelerating documentation release cycles.
- Built Python automation tools to extract JIRA data and streamline release note generation, reducing manual effort by ~**80%.**
- Implemented structured repository and version control practices aligned with engineering environments (development, staging, production).
- Standardized documentation structure and table-of-contents frameworks based on the Microsoft Style Guide to improve usability and consistency.
- Established and led a Content Review Board, introducing structured peer-review processes that improved documentation quality and governance.
- Designed documentation lifecycle processes aligned with product release cycles to ensure timely documentation readiness.
- Mentored documentation team members and introduced internal writing standards to improve onboarding and authoring efficiency.

AMPHORA SOFTWARE — Senior Technical Writer | Feb 2020 – Jul 2021

- Led end-to-end documentation lifecycle aligned with product and patch release schedules.
- Authored and maintained product documentation including user guides, release notes, and operational documentation.
- Coordinated documentation deliverables with product managers, developers, and QA teams.
- Standardized release templates and publishing repositories to improve documentation consistency.
- Collaborated with UX and engineering teams to review UI workflows and improve usability through documentation feedback.

VALUELABS — Senior Technical Writer | Jan 2018 – Feb 2020

- Reported directly to the CIO of American Credit Acceptance and led documentation initiatives across IT operations and project teams.
- Developed technical and operational documentation supporting enterprise IT systems and production support processes.
- Authored and validated API documentation using Postman.
- Managed documentation lifecycle from requirements gathering to publishing and maintenance.
- Standardized SOP documentation and improved knowledge management practices across departments.

CYIENT — Senior Design Engineer | June 2012 – Jan 2018

- Created technical documentation including user manuals, online help, troubleshooting guides, and release notes for Boeing internal tools.
- Applied Microsoft Style Guide and client documentation standards to ensure consistency and quality.
- Updated and modernized legacy process and quality documentation.
- Implemented structured authoring practices using DITA methodology.
- Led documentation deliverables aligned with product development cycles.
